CAREER OBJECTIVE

I am a very curious and highly motivated 3rd-year B.Tech Cybersecurity student at SRMIST Delhi NCR with strong programming proficiency in Python, C, and C++. I am also skilled in root cause analysis, diagnostic troubleshooting which I perceive as one of my strong points. I possess excellent communication skills in English and Hindi, with a proven ability to execute tasks efficiently both individually and in team environments.

EDUCATION

Amity International School (AISV-6)

Completed schooling from Nursery to 12th 2010 – 2024

SRM Institute of Science and Technology (SRMIST) 2024 – 2028 (Expected)

Bachelor of Technology in Computer Science & Engineering (Specialization: Cybersecurity)

Relevant Coursework: Database Management Systems, Network Security, Operating Systems, Cryptography, Data Structures & Algorithms, Computer Networks, System Programming.

TECHNICAL SKILLS

Programming:	Python, C, C++
Core Domain:	Database Management Systems (DBMS), Artificial Intelligence (AI), Multi-Factor Authentication (MFA), Packet Sniffing & Tracing
Analytical & Security:	Root Cause Analysis (RCA), System Diagnostics, Network Protocols (TCP/IP, UDP, HTTP), Anomaly Detection
Tools & Environments:	Linux (Ubuntu/Kali), Wireshark, VS Code, Git / GitHub
Languages:	English (Fluent), Hindi (Fluent)

KEY PROJECTS

Modular Multi-Factor Authentication (MFA) Verification Platform (KYC) Python • Web Architecture

- Engineered a flexible, standalone MFA verification user interface structured to serve as an adaptable authentication layer for external web applications.
- Implemented time-based verification workflows to strengthen identity verification and prevent unauthorized access or credential misuse.
- Focused on clean UI presentation and secure verification logic to streamline integration across different online platforms.

Network Packet Tracer & Sniffer Tool (In Progress) C / C++ • Python

- Developing a low-level packet capture and tracing utility designed to inspect network traffic streams in real time at the header level.
- Structuring protocol decoders (IP, TCP, UDP) to examine packet flags, payload structure, and detect transmission inconsistencies.
- Applying root cause analysis techniques to identify the origin of dropped packets, latency spikes, and network security anomalies.

CERTIFICATIONS

Database Management Systems (DBMS) Certification — *Completed* [Issuing Authority / NPTEL / Coursera]

Artificial Intelligence (AI) Certification — *Completed* [Issuing Authority / Coursera / IBM]
